CAREER SUMMARY

Full-Stack Developer skilled in React.js front-end development and Node.js back-end applications, building dynamic user interfaces and scalable RESTful APIs. Experienced with **PostgreSQL**, MySQL, MongoDB, Git, delivering maintainable, high-quality code. Strong analytical and problem-solving abilities with a proven track record in Agile team collaboration.

SKILLS & CERTIFICATIONS

- **Front-End:** React.js, Component-Based Architecture, State Management, Front-End Routing, JavaScript (ES6+)
- **Back-End:** C#. DotNet, Spring Boot, Node.js, Express.js, RESTful API Development
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Version Control & DevOps:** Git, Azure DevOps, Docker, Kubernetes
- **AI & Machine Learning:** Natural Language Processing (NLP), GANs, PyTorch, NumPy, Pandas, Hugging Face
- **CERTIFICATIONS:** [Microsoft Certified: Azure Fundamentals \(AZ-900\)](#), [Meta Certified Front-End Developer](#)

PROFESSIONAL PROJECT

Ark CRM – Built a tailored CRM enabling brokers to manage client accounts and monitor trading activity, integrated with Ark Trader's API for real-time updates. [View Project](#)

Healthcare Analytics Dashboard - Developed a React + TypeScript dashboard for patient management, diagnostics, and real-time health metric visualization, improving provider workflows and reducing manual reporting effort. [Github Repo](#) , [live Demo](#)

Universal Digital Signage Web Application – Centralized digital signage platform allowing image uploads, playlist creation, scheduling, and interactive kiosk presentations. [View Project](#), [RAID on DELL EMC R740](#) , [Custom Raspberry Pi OS](#)

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern | ISN Software Corporation | Dallas, TX *Jun 2025 – Aug 2025*

- Built **Health Check System** using **React.js, C#, .NET, Azure, SQL, Redis**, monitoring 100+ services, reducing downtime **by 50%** and improving operational efficiency.
- Optimized SQL procedures & automated cron jobs, impacting **85K+ contractors and 850 clients**.
- Implemented dashboards, logging, and alerts, **cutting internal tickets by 5%**.
- Developed and optimized SQL procedures and automated cron jobs for subscription notifications, impacting 85,000+ users.

Software Engineer (R&D) | University of North Texas | Denton, TX *Sep 2023 – May 2025*

- Developed Universal Digital Signage System (**React.js front-end, Node.js back-end, MongoDB, Docker, Kubernetes**), reducing content creation time by **90%** and saving \$40K/year.
- Built canvas-based content creation tool and deployed across 50+ Raspberry Pi devices.
- Designed scalable, fault-tolerant system with **24/7 availability** and 50+ concurrent updates.
- Managed Linux servers and databases, ensuring 100% uptime for research workloads.

Full Stack Engineer | Cyrrup Solutions (**Startup**) | Hyderabad, India *Jan 2021 – Aug 2023*

- Built **IoT platform for fleet management** and fuel theft detection (React.js + Node.js + C# + Redis + Python + ML + GCP), **reducing fuel theft by 90%** and saving 30% fuel.
- Developed real-time microservices for 2G/SMS data, trip logging, geofencing, and ML-based theft detection.
- Delivered high-impact solutions under tight deadlines, **earning 2 promotions and Bonus in 1 year**.

Full Stack Engineer | Ark Traders | Hyderabad, India *Jan 2019 – Aug 2021*

- Built **Ark CRM (React.js + Node.js)**, reducing latency, enhancing features, and improving client experience to attract more users.
- Developed **AI-based news/blog recommendation system**, increasing engagement and supporting data-driven trading decisions.
- Implemented **PostgreSQL/SQL Server RESTful APIs** for reliable, real-time trading operations serving millions of users.

EDUCATION

MASTER'S DEGREE | Computer Science | University of North Texas
