

SHIVAM JADHAV

Denton, TX | (940) 843-9864 | jadhavshivam0228@gmail.com | [LinkedIn](#) | [shivamjadhav.com](#) | [Medium Blogs](#)

EDUCATION

M.S. in Computer Science – University of North Texas, Denton, TX | Aug 2023 – May 2025

Specializations: Cloud Computing, Distributed Systems, AI/LLMs | GPA: 3.72

B.Tech. in Information Technology – JBIET, Hyderabad, India | Jun 2017 – May 2021 | GPA: 3.14

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, SQL, Bash

Frameworks & Tools: Spring Boot, Node.js, React.js, Express.js, .NET Core, REST APIs, IntelliJ, Visual Studio.

Cloud & Distributed Systems: AWS (Certified Solution's Architect Associate), Azure, GCP, Docker, Kubernetes, Microservices, Infrastructure, CI/CD, Jenkins, Linux, Nginx

Databases: PostgreSQL, Microsoft SQL Server, Redis, MongoDB, DynamoDB

Software Practices: Agile, Test-Driven Development (TDD), SOLID Design Principles, Servant Leadership, System Design, Version Control (Git), Operational Excellence, Cloud Well-Architected Framework, Security & Encryption

AI/LLMs: LLM Integration, RAG Pipelines, Vector Databases (FAISS), Prompt Engineering, Evaluation & Guardrails, OpenAI APIs

PROFESSIONAL EXPERIENCE

Senior Software Engineer & AI Consultant – University of North Texas, Denton, TX | Sep 2025 – Present

- Architected cloud-native microservices using Node.js, React, SQL, and Azure, improving infrastructure reliability by **35%**.
- Designed and deployed resilient distributed systems on Docker/Kubernetes, reducing operational costs by **\$40K/year**.
- Built intuitive real-time dashboards (React/WebSocket) with product-level polish, improving usability and achieved **24/7** uptime

Software Development Engineer Intern – ISN Software Corp., Dallas, TX | Jun 2025 – Aug 2025

- Built a **Health Check System** monitoring **100+ services** on Azure, improving uptime by **30%**.
- Automated dashboards and alerts for **85K+ contractors**, reducing support tickets by **5%**.
- Optimized SQL queries and cron jobs, improving system performance by **25%**.

Senior Software Engineer R&D – University of North Texas, Denton, TX | Sep 2023 – May 2025

- Developed Kubernetes-based signage system with CI/CD pipelines (Jenkins, Docker) supporting **50+ concurrent updates**.
- Implemented microservices architecture for real-time content management across distributed devices.
- Provided mentorship and technical guidance to junior engineers, fostering a collaborative, agile team environment.

Software Engineer Lead – Cyrrup Solutions, Hyderabad, India | Jan 2021 – Aug 2023

- Engineered flagship IoT **backend services** (Node.js, Python, GCP) reducing fuel theft by **40%**.
- Experience in IoT, fleet management, real-time telemetry, and data pipelines—highly relevant to climate and energy systems.
- Built real-time data pipelines and predictive analytics microservices with high availability on Docker/Kubernetes.

Software Engineer (Full Stack) – Ark Traders, Hyderabad, India | Jan 2019 – Jan 2021

- Maintained high-scale full-stack applications for **100K+ users** (Java, Node.js, React, Spring Boot, AWS).
 - Developed AI-driven data pipelines and dashboards, reducing downtime by **20%**.
-

KEY PROJECTS

Vehicle Black Box – Fleet Management | MEVN, Python, GCP, Kubernetes, Jenkins, [View Project](#)

- Designed **real-time IoT tracking** for 10,000+ vehicles with distributed system architecture.
- Built multithreaded Python DAC server (Socket.IO, TCP/IP, Redis, MongoDB) processing **1Million + data points/day**.
- Automated reporting and alerts, reducing manual effort by **70%** and improving operational efficiency.

Digital Signage Management System | MERN, Java Kubernetes, Jenkins, [View Project](#), [RAID on DELL EMC R740](#)

- Centralized content management across **50K+ devices** with **microservices on Kubernetes**.
- Deployed resilient infrastructure with **RAID-configured servers** and Raspberry Pi OS, saving **\$40K/year**.
- Implemented **real-time monitoring dashboards**, improving issue detection by **45%**.

Ark CRM Trading Platform | Java, Spring Boot, Node.js, React, AWS, Docker, Kubernetes, Jenkins, [View Project](#)

- Built and optimized Java/Spring Boot, Node.js, React systems for 100K+ users with mission-critical **payment APIs**.
 - Optimized **30+ reports** using minified APIs, IndexedDB and Redis, cutting load times and redundant **requests ~60%**.
-

CERTIFICATIONS

- [AWS Certified Solutions Architect – Associate](#) - Proven skills in designing secure and scalable solutions on AWS
 - [Meta Certified Front-End Developer](#) – Built scalable, responsive web applications with React.js and modern JS.
 - [AI MOVE Fellow – AI Trainer](#) – Trained on LLM evaluation, prompt engineering, and AI model validation.
-

HIGHLIGHTS

- **Leadership:** Led teams of **7 engineers**, delivering 20+ flagship applications across startups, MNC's & Research institutions.
- **Operational Excellence:** Architected highly available, scalable distributed systems and cloud services
- **Collaboration:** Partnered with cross-functional teams to deliver production-grade infrastructure supporting 100K+ users
