SUMMARY

Passionate and innovative Software Development Engineer with hands-on experience in distributed systems, algorithms, and multi-tiered architectures. Skilled in Python, and C++, I specialize in solving complex problems, delivering scalable solutions, and contributing to research-driven projects that impact millions of users.

EXPERIENCE

UNIVERSITY OF NORTH TEXAS | SOFTWARE ENGINEER

Sep 2023 – Present | Denton, TX, USA

- Designed and deployed innovative solutions, including a Universal Digital Signage Product and Raspberry Pi Clusters, enhancing the university's digital infrastructure and reducing operational costs by \$40,000.
- Engineered and automated critical systems, including a status-checking application for monitoring server uptime, which proactively detected downtime and sent real-time alerts to improve service reliability.
- Developed 5+ large-scale projects across diverse domains following SDLC, driving efficiencies through custom-built software, containerized apps, and cloud infrastructure solutions

CYRRUP SOLUTION PVT LTD | FULL STACK ENGINEER | LEAD

Mar 2021 – Aug 2023 | Hyderabad, India

- Developed a Fleet Management Solution using the MERN stack and deployed scalable microservices on GCP and AWS for over 10 organizations. I created a custom fuel theft algorithm with socket programming and multithreading, as well as a custom GP10 protocol over TCP/IP. I also successfully delivered more than 10 national-level projects for clients like Indian Railways and the Indian Army.

ARKTECH LTD | FULL STACK ENGINEER | FREELANCE

Jan 2019 – Apr 2021 | Hyderabad, India

- Developed and maintained Ark CRM for financial institutions (MERN), streamlining transactions and client management for 10,000+ users.
- Built and integrated AI-driven news recommendation features using custom web scraping, AI models like summarization and cosine similarity, based on user transaction history.

PROJECTS

UNIVERSAL DIGITAL SIGNAGE | FULL STACK ENGINEER LEAD

Sep 2023 – Present | Denton, Texas, USA

- Built and deployed a scalable digital signage solution with React.js, Node.js, MongoDB, UI/UX, database-design, Docker and Raspberry Pi, saving \$40,000.
- Designed a secure platform with JWT/OAuth and developed custom Raspberry Pi OS for seamless device control.
- Automated device configuration, improving efficiency and reducing manual work.

AI BUG PRIORITY PROBLEM | RESEARCH | MS-CS

Aug 2024 – Dec 2024 | Denton Texas, USA

- Conducted a research project on AI accessibility under Professor Wajidi Aljedani, focusing on the "Bug Priority Problem."
- Trained a custom model using ALBERT, RoBERTa, and BERT, achieving 90% accuracy with RoBERTa and up to 96% accuracy with ALBERT after extensive data curation. links:- 🛠️ AI-Model 🌐 plugin

EDUCATION

UNIVERSITY OF NORTH TEXAS

MASTER'S IN COMPUTER SCIENCE
| UNIVERSITY OF NORTH TEXAS,
DENTON, USA
Expected May 2025 | Texas, USA
Cum. GPA: 3.66 / 4.0

SKILLS

PROGRAMMING

5+ years:

- JavaScript
- Python • HTML/CSS

3+ years:

- React JS • Node Js • Javascript
- TypeScript • Mongodb • SQL • AWS
- GCP • Linux/Bash • Git • Docker •
- Redis • Machine Learning • AI •
- TCP/IP

TECHNOLOGY

MERN/MEVN • Git/Github • AWS •
Linux
Windows • Artificial Intelligence •
Automation

COURSEWORK

GRADUATE

Special Problems, Software
Engineering, Artificial Intelligence,
Computer Architecture, Graph
Theory,

RESEARCH

Telemetry Data Simulation

CERTIFICATIONS

- Meta Front-End Development
- Programming with Javascript
- Version Control
- Docker for Developers
- Linux and SQL
- Deep Learning
- Amazon Web Services Cloud Practitioner
