

SHIVAM JADHAV

Denton, TX | (940) 843-9864 | jadhavshivam0228@gmail.com | [LinkedIn](#) | [shivamjadhav.com](#) | [Medium Blogs](#)

EDUCATION

M.S. in Computer Science – University of North Texas, Denton, TX | Aug 2023 – May 2025

TECHNICAL SKILLS

Languages: C#, SQL, Java, Python, JavaScript/TypeScript, Bash

Frameworks & Tools: NET Core, ASP.NET Core, Entity Framework, Node.js, React.js, REST APIs, Visual Studio, IntelliJ

Cloud & Distributed Systems: AWS Certified Solution's Architect Associate, Azure, GCP, Docker, Kubernetes, Microservices, Infrastructure, CI/CD, Jenkins, Linux, Nginx

Databases: PostgreSQL, Microsoft SQL Server, Redis, MongoDB, DynamoDB

Software Practices: Agile, Test-Driven Development (TDD), SOLID Design Principles, Servant Leadership, System Design, Version Control (Git), Operational Excellence, Cloud Well-Architected Framework, Security & Encryption

AI/LLMs: LLM Integration, RAG Pipelines, Vector Databases (FAISS), Prompt Engineering, Evaluation & Guardrails, OpenAI APIs

PROFESSIONAL EXPERIENCE

Senior Software Engineer & AI Consultant – University of North Texas, Denton, TX | Sep 2025 – Present

Status Check – Operations Hub & Application Plane | Dev: divisionbyinfinity.github.io/ophub

- Led org-wide platform for monitoring infra, services, and endpoints, building a scalable **React/TypeScript frontend** with SOLID/OOP principles, enterprise RBAC, alerts, and resource/user management.
- Architected **cloud-native microservices on AWS** to monitor infrastructure health, integrating **OpenAI APIs** for automated log analysis and incident reporting.
- **Developed a scalable Web API with SOLID/OOP principles, supporting enterprise RBAC and real-time alerting.**
- improved operational excellence by 30% through automated infrastructure-as-code and .NET-based health-check scripts.

Software Development Engineer – ISN Software Corp., Dallas, TX | Jun 2025 – Aug 2025

- Built full stack applications using **C#, .NET Core, ASP.NET, Razor Pages, and React**, supporting enterprise-scale workflows.
- Developed a **health check monitoring system** for **100+ services** using REST APIs, multithreading, New Relic, and Azure Functions, improving uptime by **30%** and reducing support tickets.
- Delivered **5 PBIs to production**, resolving critical bugs via SQL Server stored procedures (account expiration handling), impacting **85K+ clients**.

Senior Software Engineer R&D – University of North Texas, Denton, TX | Sep 2023 – May 2025

- Led **MERN/Kubernetes platform** centralizing control for **100–10,000+** devices.
- Built microservices for real-time content delivery, scheduling, device mgmt, reduced manual update from hours to **1s**.
- Deployed RAID-backed Dell EMC R740 & Raspberry Pi OS, saving **\$40K/year**, improving reliability.
- Implemented RBAC & dashboards, improving issue detection **45%**.
- Mentored 3 engineers, owning architecture, delivery, and code quality.

Software Engineer Lead – Cyrrup Solutions, Hyderabad, India | Jan 2021 – Aug 2023

- Led development of a **real-time IoT fleet management system** tracking 10,000+ vehicles using **MERN, C#, .net Core .net MVC, Python, IoT devices, and Google Maps APIs**.
- Built **multithreaded Python ingestion server** with **Socket.IO, TCP/IP, Redis, and custom protocols**, processing **1M+ events/day**.
- Designed high availability microservices and data pipelines deployed on **Docker/Kubernetes (GCP)**.
- Automated reporting and alerting workflows, **reducing operational effort 70%** and improving response times.
- Delivered analytics and telemetry systems that **cut fuel theft by 40%**.

Software Engineer (Full Stack) – Ark Traders, Hyderabad, India | Jan 2019 – Jan 2021

- Developed **enterprise CRM and trading platform** serving **100K+ users** with mission-critical payment and reporting workflows.
 - Built **Lead Management CRM** covering end-to-end lifecycle, boosting client conversion rates by **60%**.
 - Integrated **telephony (Tata Tele APIs)** for click-to-call, call tracking, and dashboards.
 - Optimized **30+** reporting workflows with **minified APIs, IndexedDB, and Redis**, cutting load times and redundant requests **~60%**.
 - Built backend services with **C# .Net Core, java spring-boot**, frontend in **React**, and introduced **CI/CD with Jenkins and Docker**.
-

CERTIFICATIONS

- [AWS Certified Solutions Architect – Associate](#) – Proven skills in designing secure and scalable solutions on AWS
 - [Meta Certified Front-End Developer](#) – Built scalable, responsive web applications with React.js and modern JS.
 - [AI MOVE Fellow – AI Trainer](#) – Trained on LLM evaluation, prompt engineering, and AI model validation.
-

HIGHLIGHTS

- **Leadership:** Led team of **7 engineers**, delivering 20+ flagship applications across startups, MNC's & Research institutions.
