

SHIVAM JADHAV

Software Engineer

(940) 843-9864 | jadhavshivam0228@mail.com | Denton, Texas | [linkedin.com/in/shivamjadhav/](https://www.linkedin.com/in/shivamjadhav/)

CAREER SUMMARY

Software Engineer with 5+ years of experience building scalable cloud-native applications and distributed systems. Skilled in AWS, Node.js, React, and Python, with expertise in APIs, microservices, automation, and AI/ML integration. Delivered IoT and enterprise platforms that improved fleet fuel efficiency by 40% and saved \$40K in licensing costs. Certified in AWS, Azure, and Front-End Development.

EXPERTISE

Full-stack development | Cloud-native applications | Distributed systems | API & microservices design | System monitoring & automation | AI/ML model development | Cross-functional collaboration | Agile/Scrum

TECHNICAL SKILLS

JavaScript/TypeScript | React.js | Node.js | Python | C# | .NET Core | AWS | Azure | Docker | Kubernetes | GitLab CI/CD | Azure DevOps | SQL Server | MongoDB | Redis | REST APIs | PyTorch | Hugging Face | Git | Linux | Redis | Mathematics

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEER INTERN | ISN Software Corporation | Dallas, Texas June 2025 – Aug 2025

- Developed & optimized SQL procedures and automated cron jobs for subscription notifications, impacting 85K+ contractors & 850 clients, resolving lifecycle issues, package versioning vulnerabilities, and data bugs (>9-digit values).
- Built full-stack Health Check Management System (React, .NET Core/MVC, Azure, Redis) monitoring 100+ services, increasing uptime by 30%, reducing downtime, and enabling fast issue detection & troubleshooting.
- Implemented dashboards, centralized logging, and alerting, reducing internal tickets by 5% and improving operational efficiency.

SOFTWARE ENGINEER (R&D) | University of North Texas | Denton, Texas Sep 2023 – May 2025

- Developed Universal Digital Signage System, a full-stack application (React.js, Node.js, MongoDB, Docker, Kubernetes, Cockpit), reducing Manual Effort time 3–4 hours to <5 minutes, cutting manual content creation effort by >90% and saving ~\$40K/year.
- Built a canvas-based content creation feature enabling instant content design and rapid deployment across 50+ Raspberry Pi devices.
- Designed a highly scalable, fault-tolerant, Containerized & Kubernetes-ready system, supporting 50+ concurrent updates with 24/7 availability.
- Managed Linux servers, GPU setup (CUDA), and RAID imaging for AI research workloads, ensuring 100% uptime for critical systems.

FULL STACK ENGINEER | Cyrrup Solutions (Startup) | Hyderabad, India Jan 2021 – Aug 2023

- Built IoT platform for fuel theft detection and fleet management (React.js, Node.js, Redis, Python, ML, GCP), reducing diesel theft by 40% and optimizing routes for 30% fuel savings.
- Developed microservices: socket server for DashMaster hardware (2G/SMS), high-frequency data parsing, and real-time ML-based theft detection.
- Implemented fleet tracking, geofence alerts, trip logging, and weekly fuel reports, improving operational efficiency.
- Achieved 3 promotions in 1 year for delivering high-impact solutions under tight startup deadlines.

FULL STACK ENGINEER FREELANCE | Ark Traders | Hyderabad, India Jan 2019 – Aug 2022

- Built scalable Node.js APIs serving millions of users and integrated trading operations.
- Developed full-stack dashboards, reports, and margin calculator tools.
- Implemented AI-based news/blog recommendation system to support trading decisions.

EDUCATION

MASTER'S DEGREE | Computer Science | University of North Texas

2023 – 2025

CERTIFICATION

- [DeepLearning.AI \(Specialization\)](#)
- [Microsoft Certified: Azure Fundamentals \(AZ-900\)](#)
- [Meta Certified Front-End Developer](#)
- [Linux & SQL by Google](#)
- [AWS Cloud Practitioner](#)
